

SMALL GROUP DISCUSSIONS - CC'23 TRAVELING AROUND TOWN

ICE BREAKER (10 min): What is your main mode of transportation to get around town and why?

IMAGINE IT (25 min): Imagine you woke up tomorrow there were no more individually-owned cars. How would you respond? What would be good about that, what would be a challenge? What might the community need to make a car-free existence convenient? (ex: improved public transportation, more amenities nearby, better pedestrian/cyclist infrastructure, etc.)

ACTION/ADVOCACY (25 min): So often, we refer to the Heights as being “walkable” yet the majority of our survey respondents reported driving as their main method of getting around town. What action steps could/would you take to drive less and walk/roll/bike more? What kind of advocacy or action might be needed to make you less likely to reach for the car keys when you have an errand to run or a place to go?
